## 11 Toxicological information

- No acute or chronic toxic effects expected when product is used according to directions.
- Information on known toxicological effects of components:
  - Sodium Benzoate
    - Oral LD50 1600 mg / kg (mouse)
    - Teratogenic effect: classified POSSIBLE for human.
    - Developmental toxicity: Classified reproductive system / toxin / female, Reproductive system / toxin / male [SUSPECTED].
    - May cause damage to the following organs: blood, reproductive system, liver, central nervous system (CNS).
    - Hazardous in case of skin contact (irritant) or inhalation. Slightly hazardous in case of ingestion.

## 12 Ecological information

- There are no ecological or special considerations when used according to directions. Not considered environmentally harmful from normal dilution, expected use, and typical drainage to sewers, septic systems and treatment plants.
- No further relevant information available

## 13 Disposal considerations

- There are no special considerations when the product is disposed of according to local, state, and Federal regulations.

## 14 Transport information

- Not classified as a hazardous material.

## 15 Regulatory information

- Toxic Substances Control Act (TSCA): All ingredients are listed or exempt according to 15 USC 2602 (2)(B)(iv).
- Complies with current FDA regulations for cosmetic and / or over-the-counter drug products.

## 16 Additional information

The information herein is based on data considered to be accurate as of the date of preparation of this SDS. However, no warranty or representation, expressed or implied, is made as to the accuracy or completeness of the foregoing data and safety information. The user assumes all liability for any damage or injury resulting from abnormal use, from any failure to adhere to recommended practices or from any hazards inherent in the nature of the product.
